Disaster response flush toilet bowl “arsona α ” (patented)

When the lifeline is cut off in the event of a disaster such as an earthquake, the use of flush toilets becomes impossible.

“arsona α ” is a safe and hygienic toilet bowl to protect the life and to maintain the health of the sufferers and the refugees as well.

“arsona α ” can be used comfortably and hygienically even indoors as compatible with odors.

Usually, used as a flush toilet

< TF Cap >

Made immediately available for use, only by removing TF cap on the bottom of the toilet with a metal fitting, in the event of a disaster
